1. Summarize

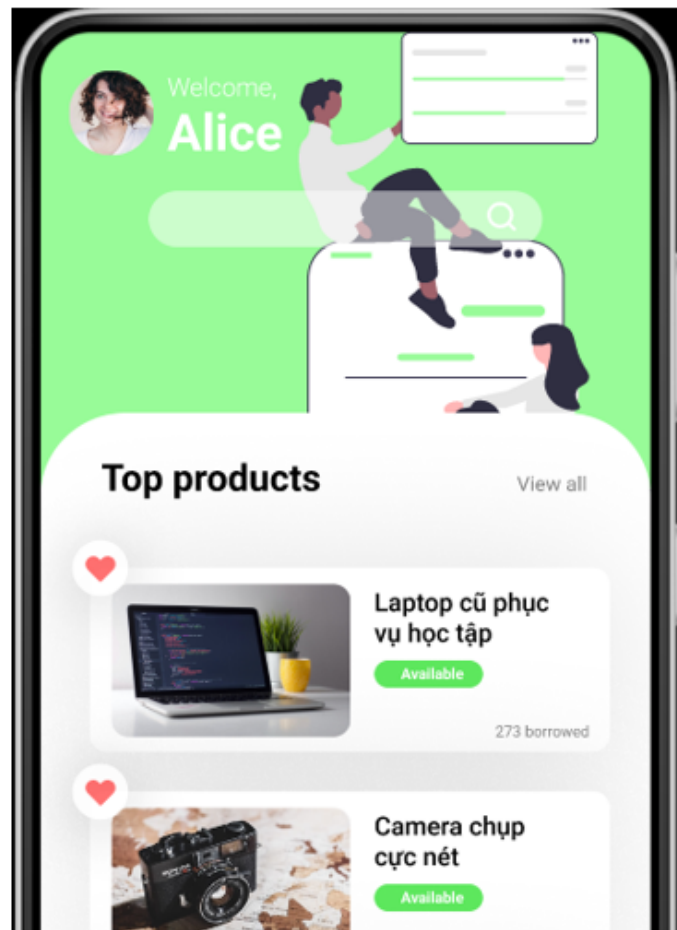

Everyone worked well and met their deadlines. Phong and Chau have almost completed implementing the UI part

2. Screenshots of all tasks

- Cẩm Phong

2) Scenario: Borrow an item

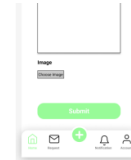

a) Homepage screen

- Đình Khôi

The homepage displays top products. Users select the "+" icon to post a new item

Lenders use this screen to post a new item. This screen shows a text boxes and a "Choose Image" button. Lenders input the item's name in the "Name" box, the description in the "Description" box and upload an image by selecting the "Choose Image" button. Finally, lender selects the "Submit" button to post the item. After that, the system will load "Item" screen if session is success.

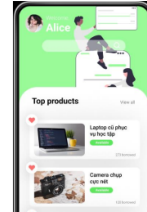

c) Item Screen

This screen displays all information of an item that a lender just posted. The information includes the
